

ALSANIT®

The background of the advertisement features a close-up, artistic photograph of a mechanical watch movement. The intricate gears, springs, and jewels are visible, with a blue-tinted overlay that matches the company's branding. The watch is housed in a light-colored metal case, with a vertical hinge and handle visible on the left side.

Description:

Full-height toilet cabins are becoming increasingly popular because they not only guarantee privacy but also allow for better coherence between sanitary interiors and the overall appearance of the building. This makes this type of WC cubicles increasingly applicable in newly constructed facilities.

The design of full-height cabins is executed considering the space and character of the rooms. However, proper preparation and finishing of the rooms before in-

stallation are important, as this system is entirely prepared at the ALSANIT factory and maintains small dimensional tolerances. Any deviations from the specified dimensions may hinder installation.

Due to its proven construction and high-quality materials, the ALTUS system performs excellently in restrooms with high traffic volume.

only Torx screws are used

doors opening outward or inward

hinges with gravity self-closing

very high durability

tailor made to individual dimensions

Full-height cabins

CE certificate valid throughout the European Union

Fittings with a brushed steel finish

Fittings developed by ALSANIT are manufactured in Poland at the company headquarters

Production on CNC machines ensures precision and short lead times

ALTUS construction details

Construction details:

Hinges

- tested durability: 200,000 open/close cycles
- typically for ALSANIT, mounted to narrow edges of panels
- made of brushed steel with a polyamide insert
- gravity self-closing
- minimalist appearance
- optionally - hinges for internal doors not visible from the outside

Knob-locks

- elegant, ergonomic and highly durable
- emergency opening capability
- universal for left/right doors
- bolt rotation angle of 360°
- „click“ every 90°
- easy to use, including for individuals with disabilities
- white-red occupancy indicator

Support-legs (Optionally)

- made of brushed steel
- ensure easy leveling of partitions
- for 10-18 mm boards mounted to the side of the board, for 28 mm and thicker boards screwed into the core
- adjustment range +/- 20 mm
- rosette mounted on two dowels, covered with a plate

Types of panels available for the system:

MFC

Laminated chipboard

18 mm

28 mm

MFC is compressed under high temperature and pressure using binding agents with wood chips. The top layer is a decorative melamine coating.

- edges are finished with durable edging using HOT-AIR technology (glueless)
- suitable for rooms with normal humidity

Fire classification: Ds1d0

A solution for door frame for MFC boards

Rear-mounted beam

Wall and partition mounting

Optionally Support leg mounted frontally for 18 mm boards

Optionally Support leg screwed into the core for 28 mm boards

HPL

High pressure laminate

10 mm

12 mm

HPL (High Pressure Laminate) - cellulose fibers saturated with resin and compressed under high pressure. The material is 100% waterproof and its properties are consistent throughout the entire board cross-section.

- milled edges-black core of the board is visible
- for rooms with high humidity

Fire classification: Cs2d0 - 10 mm, Bs1d0 - 12 mm (option)

A solution for door frame for HPL boards

Rear-mounted beam

Wall and partition mounting

Optionally Support leg mounted frontally

SP

Sandwich panels

36 mm

Panels with a total thickness of 36 mm - feature an aluminum frame filled with foamed polystyrene, 28 mm thick, with outer layers consisting of 4 mm HPL.

- excellent rigidity and aesthetics
- ideal for full-height installations
- provide the best soundproofing

Fire classification: Es1d0

A solution for door frame for SP boards

Rear-mounted beam

Concealed mounting for walls and partitions

Possibility of using a handle

Optionally Support leg screwed into the core

URINAL PARTITIONS

By using an aluminum rosette, we achieved an effect of exceptional lightness.

ALSANIT urinal partitions are installed using rosettes, eliminating the need for support legs.

SHOWERS

Shower cubicles produced by ALSANIT are aesthetic, practical, and durable.

Thanks to the use of durable, and fully waterproof materials, ALSANIT shower cubicles are an investment for many years. Showers are typically made basing on the SOLARI system fittings.

HPL

10 mm

12 mm

Installation:

1. Level and mount the bottom profile to the floor.

2. Place the steel frames for cladding on the profile, align, and attach them to the masonry wall.

3. Connect the frames with „shadow” panels. Mount masking panels at the bottom and top.

4. Fit the cladding panels up to the height of the utilities and fixtures. For the cladding where fixtures will be installed, cut openings for the connections/fixtures.

5. Secure and connect the fixtures to the cladding.

6. Install the remaining cladding.
