Description:

VITRAL cabins are perfectly suited for exclusive interiors, providing an exceptional visual effect. They are made of double-layered, tempered glass, which is further laminated, allowing for color customization. The tempering process ensures aesthetics and safety, as the doors become hard and resistant to damage.

We understand that the devil is in the details, so all metal elements of cabins are precisely manufactured on our CNC machines. As a result, VITRAL ca-

bins are characterized not only by high aesthetics but also by excellent quality of workmanship.

It is worth noting that preparing the rooms for the installation of these cabins is crucial to achieve the best results. We recommend early contact and utilizing the support of the ALSANIT team during the planning and implementation stages. Glass enclosures require special attention to ensure an impressive end result.

only Torx screws are used

doors opening outward or inward

hinges with gravity self-closing

very high durability

tailor made to individual dimensions

VITRAL construction details

Construction details:

Hinges

- front / rear mounted
- gravity self-closing
- durability: 200,000 open/closed cycles
- minimalist appearance

Knob-locks

- elegant, ergonomic and highly durable
- emergency opening capability
- universal for left/right doors
- bolt rotation angle of 360°
- „click“ every 90°
- easy to use, including for individuals with disabilities
- white-red occupancy indicator

Support-legs

- effect of „hanging“ cabins
- recessed 15 cm into the cabin
- ensure easy leveling of partitions
- adjustment range +/- 20 mm to the floor
- rosette mounted on two dowels, covered with a plate

Panels available for the system:

GLASS

Tempered glass

10 mm

12 mm

Tempered glass available in a wide range of RAL colors. To ensure the highest quality of cabins, we use laminated glass. Each panel is constructed with two sheets.

- milled edges
- suitable for rooms with normal and high humidity
- possibility of custom graphics

A solution for door frame

Support leg mounted on the partition wall

Rear-mounted beam

Wall and partition mounting with L brackets

VITRAL - a unique system for exceptional interiors

ALSANIT has the necessary expertise and machinery to offer such sophisticated solutions as the VITRAL system.

All metal fittings of the cabins are manufactured on our CNC machines. This ensures that VITRAL cabins have a unique character and are meticulously crafted in every aspect.

URINAL PARTITIONS

By using an aluminum rosette, we achieved an effect of exceptional lightness.

ALSANIT urinal partitions are installed using rosettes, eliminating the need for support legs.

Sink countertops are an important element of restroom furnishings.

Due to the direct exposure to water, they need to be made of durable materials and properly installed.

Installation:

1. Level and mount the bottom profile to the floor.

2. Place the steel frames for cladding on the profile, align, and attach them to the masonry wall.

3. Connect the frames with „shadow“ panels. Mount masking panels at the bottom and top.

4. Fit the cladding panels up to the height of the utilities and fixtures. For the cladding where fixtures will be installed, cut openings for the connections/fixtures.

5. Secure and connect the fixtures to the cladding.

6. Install the remaining cladding.
